

PCCA VersaBase® Foam

Versatile Topical Foam Base

PCCA # 30-3654

VersaBase Foam is made using the latest natural surfactant technology in order to be gentle on the skin. It is a solution that requires a foam dispenser to create the foam. VersaBase Foam base may be used at lower concentrations when desiring to leave on the skin (without washing off), as it provides great moisturizing ability. And, it may be used at up to a 100 percent concentration as a cleanser – usual ranges for this use are 50 to 100 percent.

It is a very stable foam, and maintains its structure and form. Active ingredients can be incorporated into the solution, giving it both pharmaceutical and cosmetic applications.

VERSABASE FOAM CHARACTERISTICS

- Anionic surfactant
- Natural source
- Hypoallergenic
- Non-comedogenic
- Highly biodegradable
- Excellent cleanser
- Weakly acidic in a solution (similar to the skin)
